RE: NOMAD INTRODUCES THE PF07 1/4" POLY PUMP

PWR-FLO™

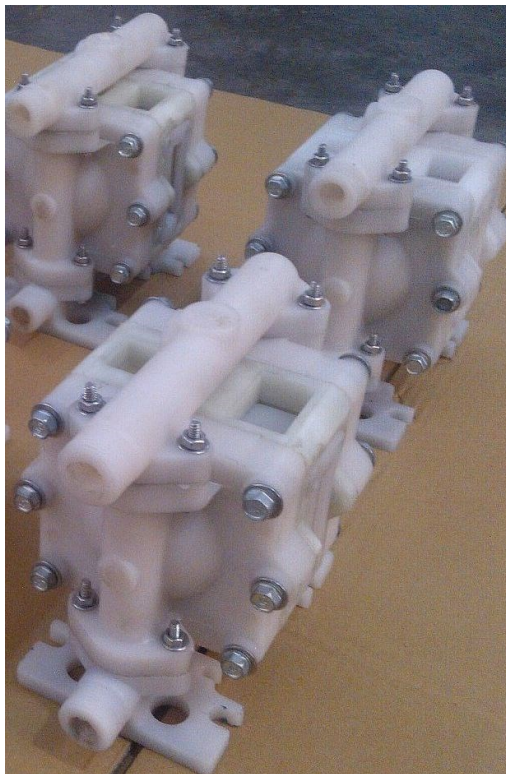

JDA GLOBAL LLC is pleased to announce the introduction of the PF07 1/4" polypropylene pump. This pump unit features the new PWR-FLO™ air distribution system, with asymmetrical spindle design.

The PF07 is a perfect low flow transfer pump, with a diverse application spectrum including chemical mixing, dosing and lab tech transfer. The PF07 also features a one piece integral PTFE diaphragm, whereby the outer piston is enveloped by the diaphragm, thus reducing the number of spare parts and eliminating debris from collecting under an outer plate.

**ORDER NOW BY THE
"6 PACK"**

**MOST COMPETITIVE
PRICE IN THE
INDUSTRY**

One page PF07 flyer, featuring dimensions and performance curve, sent under separate cover.
