RE: INTRODUCTION OF 1.5” DUCTILE PUMP

JDA GLOBAL is pleased to announce the introduction of the 1.5” ductile iron pump (clamped and threaded). This model can be equipped with PWR-FLO™ air distribution system (pictured below in poly) or in the metallic option, or with the TRANS-FLO™ valve design, giving the customer various options for individual application requirements.

The 1.5” ductile unit completes the NOMAD™ “family” of ductile products, whereby the 2” and 3” versions are already on the market.

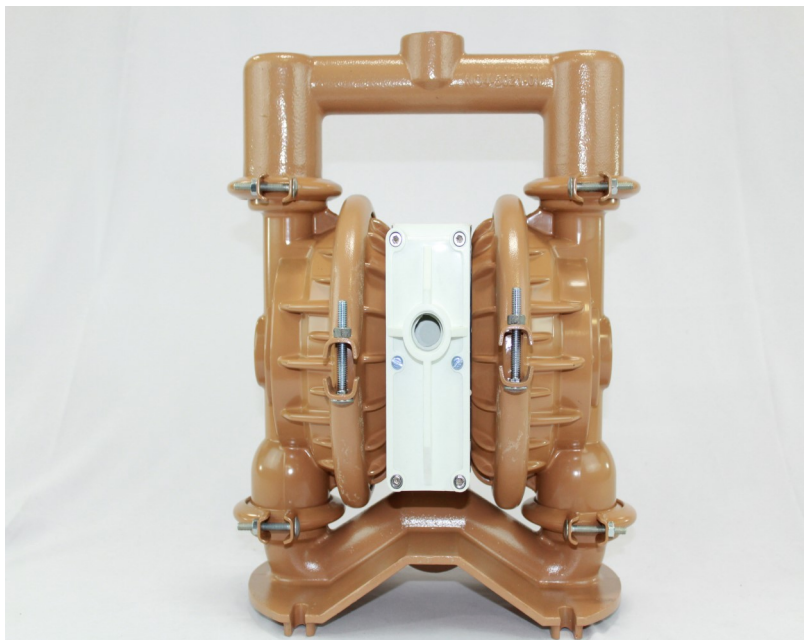

The ductile material (which provides greater tensile strength when compared to cast iron), provides an excellent alternative metal source for mining, marine and construction applications.

For nomenclature and price, contact JDA GLOBAL.
